**2+ YEARS**

Driving experience

**CLEAN**

No accidents or penalty points

**ADAS**

ACC · Lane keep · Steering assist

**170 · AL**

TOEIC Speaking

## DRIVER PROFILE

|            |                         |
|------------|-------------------------|
| License    | Class 2 Ordinary        |
| Issued     | 2020                    |
| Roads      | Urban & highway         |
| Navigation | Frequent route planning |

## OPERATION READINESS

- ✓ 16:00–01:00 night shift
- ✓ Weekend work
- ✓ Domestic & international travel
- ✓ Available from Aug 2026

## TOOLS & LANGUAGES

|         |      |           |
|---------|------|-----------|
| Windows | Word | Excel     |
| Python  | Git  | Basic WSL |

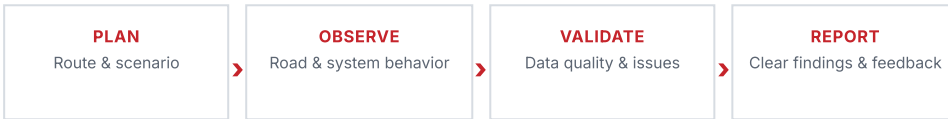

**Korean** Native  
**English** TOEIC Speaking 170 (AL)

Six months of schooling in the Philippines;  
comfortable communicating across cultures.

## CERTIFICATIONS

- Industrial Safety Engineer
- Construction Safety Industrial Engineer
- Class 2 Ordinary Driver's License

## 01 OPERATING WORKFLOW

## 02 RELEVANT PROJECT EXPERIENCE

A

**SafeFit AI**

Solo Project · 2026

Safety workflow · deterministic ranking · validation loops

- Converted natural-language work descriptions into structured risk tags, validated questions and reviewable reports using React, FastAPI and SQLite.
- Designed deterministic ranking and feedback loops so logged issues improve later recommendations.

B

**SafeRoad**

Geospatial Data · 2026

Route comparison · risk factors · scenario review

- Built route-ranking logic using crime, pedestrian and environmental data to compare candidate paths and recommend safer routes.
- Visualized regional and time-based risk factors for route review and scenario-based decisions.

C

**Industrial PPE Detection**

Computer Vision · 2026

Visual monitoring · post-processing · test interface

- Implemented YOLO-based, person-centric detection for hardhat and safety-vest states across image, video and webcam inputs.
- Built a Gradio interface to inspect results and identify detection or input issues.

## 03 EDUCATION & TRAINING

2019.03 – 2025.02

**Tongmyong University**

Bachelor's in Architectural Engineering  
GPA 3.84/4.5 · Major 4.03/4.5

960 HOURS · COMPLETED

**HDC Labs**

Generative AI for Smart IoT Analytics & Service Development
